

Non-toxic and 100%
Biodegradable

Reduces Bacterial Growth

Can replace most
Sgrassatore, bleach and
many other cleaning
products. Just add different
amounts of water!

100% water soluble and
non-caustic

Non-allergenic, non
Carcinogenic

Alkaline Based, No nasty
fumes, Safe for most
surfaces & safe for marine
life

No bleach, ammonia,
or phosphates

Reduces Time & Labor Costs
& Increases productivity

Better End Results /
Satisfied Clients

Safe Kleen is probably the most diverse and versatile cleaning solution you will find. Spray onto any surface, scrub, rinse and dry. We certainly have seen nothing that comes close to cleaning so many surfaces, so effectively and all completely eco-friendly!

It's been responsible for improving efficiency and profits for many cleaning situations where the highest standards of cleaning are required.

What other cleaning agent will safely clean a food work area, and yet be powerful enough to dissolve oil from a shipping port or car garage!

Commercial cleaning companies can transform results and give just one cleaning solution to tackle all tasks giving better results in half the time.

Deep industrial cleaning, kitchen degreasing, floor cleaning, Stainless steel, carpet spotting, oil removal from a driveway or factory floor - Safe Kleen does it all ... Just add different amounts of water!
(See Dilution Chart on reverse)

Safe Kleen has been listed by the [U.S. Environmental Protection Agency on the National Contingency Plan \(NCP\) Schedule](#) as a surface washing agent for use in emergency spills* for this listing Safe Kleen underwent extensive and stringent testing by E.P.A approved laboratories

Effective at high dilution up to 1 to 200 parts water, hot or cold just 5 liters can make up to 1,000 liters of cleaning fluid! Easily and gently removes road dirt and grime. Fantastic for washing cars, bikes, commercial vehicles, plant machinery to deep cleaning of tiles! Non corrosive on aluminum, steel, metal surfaces, glass and rubber! May be used on many types of soft fabrics! Ideal for hot or cold pressure wash machines and wash/vac Systems! Contains rinse off additive!
100% Biodegradable

Commercial cleaning companies can achieve better results and give just one cleaning solution to tackle all tasks!!

Stubborn stains may require more than one treatment.

Application Instructions & Mixing Ratios

Mix desired ratio of Safe Kleen and water depending on level of dirt and type of surface that needs cleaning. For most surfaces a small spray bottle will be ideal while for washing floors a watering can will ease the job. This will help in evenly distributing the mix and allowing the surface to be soaked for 10 minutes before scrubbing.

Start scrubbing with a brush or a floor scrubbing machine to deeply wash the surface. Once scrubbed rinse with plenty of water and dry floor by using squeegee to a drain or wet vac to collect water. Eliminate the use of mops or floor cloths especially in catering sectors.

Caution: Do not use in hot direct sunlight or on hot surfaces. Always test a small area first if uncertain.

Task	Surface Being Cleaned	Dilution Ratio
Heavy Duty Cleaning of: Garages / Mechanics Kitchens / Hotels Car Parks / Hangars Shipping	Auto Parts Cleaning – Smoke and Soot – Cleans Pollution Easily Heavy Grease and Oils – Oil Leaks/Car Parks BBQ grills – Cooker Hoods/Pots/Pans/Ovens Heavy Duty De-greasing Oil & Fuel Spills / Aviation Fuel / Street Cleaning Oil Stains on Fabrics	1:1 – 1:25
